### Official statement regarding counterfeit Thunderbike parts

Dear Customers, Thunderbike- and Harley Davidson Enthusiasts,

For several months we are now receiving messages and notifications from customers all around the world, addressing shops and advertisements which seem to offer "original Thunderbike parts" for a steal.

#### **Those parts aren't original Thunderbike parts!**

The offered parts are very low in quality and do not fulfill certain regulations Thunderbike makes sure to provide, like TÜV approvals and high quality commodities.

How can fake shops be identified?

Thunderbike only offers original parts through it's official websites and dealers.  
Official dealers can be found through our homepage thunderbike.de.

If a shop offers our parts for a very low price it can already be identified as a fake shop and we do not recommend to order there.

Thunderbike doesn't take any responsibility for parts bought over such a shop.

If you are not sure about whether you are about to order through a fake shop or not, feel free to reach out to us.

Kind regards,

Team Thunderbike
